TRAFFIC INCIDENT MANAGEMENT BOOK

Prepared September, 2005

Prepared By

Clinton County Multi Disciplinary Safety Team

In Cooperation With

Iowa Governor's Traffic Safety Bureau

Acknowedgements:

City of Clinton Police Department, City of Clinton Fire Department, City of Clinton Emergency Medical Services, City of Clinton Engineering Department, Clinton County Sheriff's Department, Clinton County Secondary Road Department, Clinton County Civil Defense, Iowa Department of Transportation, Iowa State Patrol, Iowa Governor's Traffic Safety Bureau, Federal Highway Administration, and East Central Intergovernmental Association.

The Clinton County Multi Discipliary Safety Team (MDST) was formed in October of 2004 with assistance from the Iowa Governor's Traffic Safety Bureau. The group consists of emergency response stakeholders throughout the City and County of Clinton including the City of Clinton Police Department, City of Camanche Police Department, City of Fulton Police Department, City of deWitt Police Department, City of Clinton Fire Department, City of Clinton Emergency Medical Services, City of Clinton Engineering Department, Clinton County Sheriff's Department, Clinton County Secondary Roads Department, Iowa Department of Transportation, Iowa State Patrol, Iowa Governor's Traffic Safety Bureau, Federal Highway Administration, and East Central Intergovernmental Association. This group currently meets every two months on the last Friday of the month.

The purpose of this group is to work together to identify problems, needs and address saftey realted emergencies to traffic and pedestrian safety. The Group fomulate plans, incident management manual and strategies to potentially solve or mitigate identified problems and needs, manage the implemention of these plans and strategies, and evaluate implementation strategies based upon their effectiveness and efficiency.

One of the first needs identified by the MDST was incident management. The MDST identified the need for a traffic assistance program designed to aid agencies in rerouting vehicle traffic on highways in the event of a road closure. The MDST recognized road closures could unexpectedly ocurr at any time due to a variety of different situations (i.e. hazardous material spill, aviation disaster, major vehicle crash, etc.). As a result of this identified need, the MDST took the lead in developing an incident management strategy manual for traffic routing.

This manual is comprised of City and County road maps with detours marked for emergency routing. In addition to the maps provided, detailed written instructions accompany the road maps to clarify the description of the detour. The manual contains

different sections for City of Clinton, City of DeWitt, City of Fulton, City of Camamche and Clinton County.

Generally, the detour routes should be used when a long-term road closure is needed. Long-term is defined as twenty-four (24) hours or more.

However, there may be situations in which a detour route will be needed within the 24 hour waiting period. Each incident will be evaluated on a case-by-case basis. In these instances, the IDOT and law enforcement officials will determine what detour is needed and can be implemented.

The MDST is responsible for the content and modifications to this incident management manual. Please contact the East Central Intergovernmental Association at (563) 556-4166 with any questions, errors, or recommendations related to the content of this manual.

Table of Contents

Clinton County

COMPLETE LANE BLOCKAGE

- 1. Determine the juridiction and contact people.
- 2. In all situations the first thing to accomplish is the seperation of the incident from other vehicles utilizing the corridor.
- 3. Notify Clinton County Communications Center of the incident via radio or phone.
 - Clinton County Sherrif's Department (563) 242-9211.
 - City of Clinton Police Department (563) 242-1458.
 - City of Camanche Police Department (563) 259-8575.
 - City of Dewitt Police Department (563)-659-3145.
- 4. Initiate the use of the appropriate Changeable Message Sign.
 - a. Contact the Law Enforcement agencies that would be affected by the traffic rerouting. Adivse start time and projected end time for the detour action. (See page 8 of this handbook for phone numbers).
 - b. Contact one of the following officals of Iowa Department of Transportation to request initilization of Changeable message Signs.
 - c. Advise IDOT which traffic management plan scenerio to implement, e.g if there is an incident on **Z-34 Between U.S. 136 and U.S. 64**:
 - Southbound traffic will divert east onto U.S. 64 then south on Z-40, then west on E-50, then south on E-50 to the intersection with U.S. 136 west to the intersection with Z-34.
 - Northbound traffic will divert east on U.S. 136 to northbound E-50, then east on E-50 then north on Z-40 to U.S. 64, then west on U.S. 64 to the intersection with Z-34.

SINGLE LANE BLOCKAGE

In all situations the first thing to accomplish is the seperation of the incident from other vehicles utilizing the corridor.

- 1. Notify Clinton County Communications Center of the incident via radio or phone.
 - Clinton County Sherrif's Department (563) 242-9211.
 - City of Clinton Police Department (563) 242-1458.
 - City of Camanche Police Department (563) 259-8575.
 - City of Dewitt Police Department − (563)-659-3145.
- 2. Initiate the use of the appropriate Changeable Message Sign.
 - a. Contact one of the following officals of Iowa Department of Transportation to request initilization of Changeable message Signs.
- b. Advise IDOT which traffic management plan scenerio to implement.
- c. Contact the police departments which would be affected by the traffic re-routing. Advise start time and projected end time for the detour action. (See page XI of this handbook for phone numbers). The department has a typical traffic control plane for single lane clouser see TC-1 or have flaggers with radio's (sherriff's office personal)

HAZARDOUS MATERIAL ACCIDENT

The local fire department should be called to the scene and incident command will be utilized. The law enforcement agencies will continue to act in the capacity of traffic control to help ensure the safety of other motorists on the network.

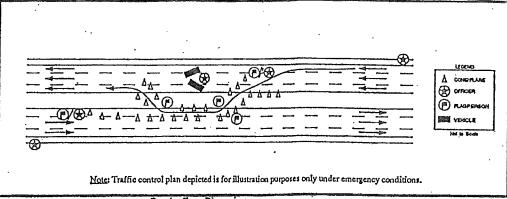

It may not be immediately possible to identify the hazardous or toxic materials or chemicals involved in the spill, so emergency response personal should always assume the substances are highly toxic, even in small quantities and take proactive action.

1. Fire Departments

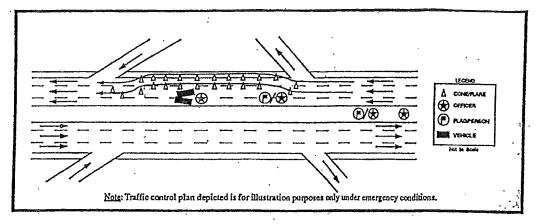

- a. Assume the role of incident Command (IC) on the scene. Implements the incident Command System (ICS).
- b. Determines the severity of the incident and directs the response operations regarding:
 - State of the incident
 - Harmful nature of materials involved
 - Type, conditions and behaviour of shipping container
 - Conditions (location, time and weather)
 - Spread of hazardous substances after releases
 - Potential losses versus control measures available
- c. The first unit responding shall:
 - Serve as on-scene commander
 - Perform initial on-scene assessment
 - Establish a command post as required
 - Take tactical and operational actions regarding fire suppression and other immediate public safety requirements
- d. Establishes staging areas upwind at highest elevation. Coordinates with on-scene authorities and the EOC. Decides which public protection actions are appropriate based on the inital phase of the incident; clearly specifies objectives and tactics:
 - Rescue of the injured, if possible, and commencement of evacuation from exposure area of issues orders to stay indoors
 - Coordinates as well as implements the necessary resources in order to neutralize or contain hazardous materials or waste with or without a fire
 - Manages immediate containment requirements as required

- e. Coordinates the activites of all support agencies at the incident Command Post, briefs the medical, law enforcement and other authorities on the hazard evaluation and environmental assessment.
- 2. Secondary Roads / Public Works
 - a. Assist in necessary road clouseres, detours and establishment of control zoned at the direction of the IC. Ensures coordination with IADOT on state and federal road clousers.
 - b. Provides techinical assistance and resources to support hazardous matrials containment activities.
 - c. Secondary Roads and Public Works personnel will coordinate the posting of contaminated areas and assist fire departments with decontamination efforts.
- 3. Iowa Department of Natural Resources, Environmental Protection Division
 - a. Responsible for response to a hazardous substance release in the State of Iowa as outlined in State and Fedral law. State law mandates immediate notification to DNR of all incidents involving hazardous materials.
 - b. Provide technical guidelines on the response and recover of hazardous matrials incident.
